**Subject:** homeless shelter

The city operates a homeless shelter with the capability of allowing pets without the features to allow for safety of the animals and owners.

Too many have been in fights, (as will always happen as a dog park) also many are off leash per comments at city council meetings.

I propose funding and area dedicated to provide dog runs and dog kennels to allow dogs to do their business and stretch their legs safely in a contained area without risks of fights.

Several 10x10 kennel spaces set up to allow owners to walk them to the kennel and allow them time to smell, potty and just be off leash is optimal. 1-2 dog runs to play fetch and run around is optimal as well.

Retriever kennels are built to contain and provide space and can be easily built.

Tracy DogGirls Rescue would be willing to plan the dog runs and kennel spaces and even build them and provide the capabilities to manage this along with dog training by a certified dog trainer. Reach out for more information if interested [REDACTED]
